Chapter 1

The first chapter

1.1 The first section

1.1.1 The first subsection

$$\mathbf{Y} = \mathbf{X}\boldsymbol{\beta} + \boldsymbol{\varepsilon} \tag{1.1}$$

We define $\hat{\beta}$ as follows

$$\hat{\beta} := \arg\min_{\beta} \left\{ \frac{\|\mathbf{Y} - \mathbf{X}\beta\|_2^2}{n} + \lambda \|\beta\|_1 \right\}$$
 (1.2)

Lemma 1.1 (Basic Inequality).

$$\frac{\left\|\mathbf{X}\left(\hat{\beta} - \beta^{0}\right)\right\|_{2}^{2}}{n} + \lambda \|\hat{\beta}\|_{1} \leq 2 \frac{\varepsilon^{T} \mathbf{X}\left(\hat{\beta} - \beta^{0}\right)}{n} + \lambda \|\beta^{0}\|_{1}$$

Proof. By definition of $\hat{\beta}$, we have that

$$\forall \beta \quad \frac{\|\mathbf{Y} - \mathbf{X}\hat{\beta}\|_2^2}{n} + \lambda \|\hat{\beta}\|_1 \le \frac{\|\mathbf{Y} - \mathbf{X}\beta\|_2^2}{n} + \lambda \|\beta\|_1$$

In particular for $\beta = \beta^0$ we have

$$\frac{\|\mathbf{Y} - \mathbf{X}\hat{\beta}\|_{2}^{2}}{n} + \lambda \|\hat{\beta}\|_{1} \le \frac{\|\mathbf{Y} - \mathbf{X}\beta^{0}\|_{2}^{2}}{n} + \lambda \|\beta^{0}\|_{1}$$

$$\frac{\left\|\mathbf{Y} - \mathbf{X}\hat{\boldsymbol{\beta}}\right\|_{2}^{2}}{n} + \lambda \|\hat{\boldsymbol{\beta}}\|_{1} \leq \frac{\left\|\mathbf{Y} - \mathbf{X}\boldsymbol{\beta}^{0}\right\|_{2}^{2}}{n} + \lambda \|\boldsymbol{\beta}^{0}\|_{1}$$

$$\Rightarrow \frac{\left\|(\mathbf{X}\boldsymbol{\beta}^{0} + \boldsymbol{\varepsilon}) - \mathbf{X}\hat{\boldsymbol{\beta}}\right\|_{2}^{2}}{n} + \lambda \|\hat{\boldsymbol{\beta}}\|_{1} \leq \frac{\left\|(\boldsymbol{X}\boldsymbol{\beta}^{0} + \boldsymbol{\varepsilon}) - \mathbf{X}\boldsymbol{\beta}^{0}\right\|_{2}^{2}}{n} + \lambda \|\boldsymbol{\beta}^{0}\|_{1}$$

$$\Rightarrow \frac{\left\|\mathbf{X}(\boldsymbol{\beta}^{0} - \hat{\boldsymbol{\beta}})\right\|_{2}^{2} + \left\|\boldsymbol{\varepsilon}\right\|_{2}^{2} + \left\langle\mathbf{X}(\boldsymbol{\beta}^{0} - \hat{\boldsymbol{\beta}}), \boldsymbol{\varepsilon}\right\rangle}{n} + \lambda \|\hat{\boldsymbol{\beta}}\|_{1}$$

$$\leq \frac{\left\|(\mathbf{X}\boldsymbol{\beta}^{0} + \boldsymbol{\varepsilon}) - \mathbf{X}\boldsymbol{\beta}^{0}\right\|_{2}^{2}}{n} + \lambda \|\boldsymbol{\beta}^{0}\|_{1}$$
